LIVE SURGERY II

SEPTAL PERFORATION

SUMMARY

Introduction to Septal Perforation: Case Studies at Hospital Poniente, Almería

Welcome to this specialized course on septal perforation, presented by the team at Hospital Poniente Almería.

In this session, we will explore two distinct cases of septal perforation, a condition that can significantly impact respiratory function and quality of life. Through detailed case discussions, we will delve into the diagnostic challenges, management strategies, and treatment outcomes. This course aims to enhance your understanding of septal perforation, providing valuable insights for clinicians and specialists dealing with similar cases. Join us for an engaging and educational experience!

SCHEDULE

08:30

Anatomy for Septal Perforation Surgery: A Quick Overview by Dr. Langdon

This section will highlight the key arteries of the nasal septum, including the anterior and posterior ethmoidal arteries and sphenopalatine artery, vital for minimizing bleeding during surgery.

09:15 - 10:30

Case 1

Dr. Langdon, Dra. Van Gerven, Dr. Villarroel

10:45 - 11:15

Cocaine Abuse and Septal Perforation: Insights by Dr. Marcelo Dávila

This section will explore the impact of cocaine abuse on septal perforation, focusing on how it disrupts nasal blood flow and contributes to tissue damage, leading to perforation.

11:15

Coffee Break

11:45 - 13:00

Case 2

Dr. Langdon, Dra. Van Gerven, Dr. Villarroel

13:15 - 13:45

Key points on managing septal perforation patients by Dra. Maria Jose Gamiz

This section will cover the diagnosis, treatment options, and effective management strategies for septal perforation patients to ensure optimal care.

AVAILABLE BOTH REMOTELY AND ON-SITE
